### PROFILE

Frontend-focused developer building responsive websites, expressive interfaces, and interactive digital products. Strongest work sits where visual direction meets practical implementation: semantic structure, useful motion, accessible controls, and polished small-screen experiences.

### CORE CAPABILITIES

Frontend: HTML5, CSS3, JavaScript, TypeScript, Next.js, React, responsive design, semantic markup

Interaction & delivery: Three.js, motion, keyboard and pointer UX, Git/GitHub Pages, lightweight automated testing

### SELECTED INDEPENDENT PROJECTS

#### LOOT - Interactive 3D Storefront

Three.js / JavaScript

Created a game-like merchandise experience with product selection state, 3D inspection, keyboard and pointer controls, responsive purchase UX, reduced-motion support, and Node.js tests.

#### MIZRACH PINAZ - Music and Culture Homepage

HTML / CSS / JavaScript

Translated a distinct band identity into a responsive promotional site with music, tour, gallery, and booking information, using a custom visual system, typography, gradients, and motion.

#### Ice Cream Invitation - Interactive Campaign Page

HTML / CSS / JavaScript

Built a self-contained, mobile-aware invitation experience with playful interaction, accessible form flow, visual feedback, and animation timing tailored to a simple user goal.

#### John Gulliver Portfolio - Recruiter-Facing Site

Next.js / TypeScript

Built and deployed a static Next.js portfolio with focused case studies, live and source links, social metadata, responsive layout, type checks, linting, and build-based tests.

### TARGET WORK

Responsive marketing sites, portfolios, campaign pages, and e-commerce product stories.

Interactive UI, visual frontend implementation, mobile-first refinement, and GitHub Pages delivery.
