AI Implementation & Creative Frontend Developer

Philippines · Available for remote work

PROFILE

Frontend-focused developer building responsive websites, expressive interfaces, interactive digital products, and practical automation experiences. Experienced with landing-page implementation, e-commerce interfaces, accessible controls, responsive UX, and n8n chatbot workflows. Strong visual judgment, careful troubleshooting, and a fast-learning approach to new systems.

RELEVANT EXPERIENCE

Personal n8n Chatbot Workflow

- Built a personal chatbot workflow using n8n and gained hands-on experience with workflow logic, testing, and AI-assisted automation.

SELECTED PROJECTS

LOOT — Interactive 3D Storefront

Tools: Three.js, JavaScript, Node.js

- Built a game-like merchandise experience with product selection state, 3D inspection, keyboard and pointer controls, responsive purchase UX, reduced-motion support, and automated tests.

MIZRACH PINAZ — Music & Culture Homepage

Tools: HTML, CSS, JavaScript

- Translated a distinct band identity into a responsive promotional site with music, tour, gallery, and booking information using a custom visual system, typography, gradients, and motion.

Ice Cream Invitation — Interactive Campaign Page

Tools: HTML, CSS, JavaScript

- Built a mobile-aware invitation experience with playful interaction, accessible form flow, visual feedback, and carefully timed animation.

John Gulliver Portfolio — Recruiter-Facing Site

Tools: Next.js, TypeScript, GitHub Pages

- Built and deployed a static portfolio with focused case studies, live and source links, social metadata, responsive layout, type checks, linting, and build-based tests.

CORE SKILLS

- AI & automation:** n8n chatbot workflows, workflow logic, AI-assisted automation, testing and troubleshooting
- Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js, responsive design, semantic markup
- Interaction:** Three.js, motion, keyboard and pointer UX, accessible controls, mobile-first refinement
- Delivery:** Git, GitHub Pages, automated testing, deployment, documentation of project work

TOOLS

n8n · Hermes · HTML · CSS · JavaScript · TypeScript · React · Next.js · Three.js · Node.js · Git · GitHub Pages

WORK FOCUS

Landing pages, responsive marketing sites, e-commerce product stories, interactive UI, website chatbot experiences, visual frontend implementation, and mobile-first refinement.
